Advances in
Polymer Technology
Journal of the Polymer Processing Institute

The Polymer Processing Institute (PPI) is an independent research corporation headquartered at Stevens Institute of Technology with laboratories at Stevens and the NJ Institute of Technology. Its mission is to serve industry by advancing the scientific underpinnings of polymer technology through industry-sponsored research, development, and education, and to disseminate information pertaining thereto via all appropriate mechanisms for technology transfer.

Contents of Volume 15

Number 1, Spring 1996

FEATURES

Design Sensitivities of Mold-Cooling CAE Software: An Experimental Verification 1
J. A. Henz and K. Himasekhar

A Method for Estimating Bulk Malt Temperature and Part Weight in Injection Molding of Amorphous Thermoplastics 17
A. E. Varela, M. R. Kamal, and W. I. Patterson

Use of Process Data Obtained from a Data Acquisition System for Optimizing and Debugging Extrusion Processes 29
K. S. Hyun and M. A. Spalding

Enhancement of Mixing Performance of Single-Screw Extrusion Processes via Chaotic Flows: Part I. Basic Concepts and Experimental Study 41
S. J. Kim and T. H. Kwon

Enhancement of Mixing Performance of Single-Screw Extrusion Processes via Chaotic Flows: Part II. Numerical Study 55
S. J. Kim and T. H. Kwon

Rotational Molding of Liquid Plastic Systems: An Assessment of Material Moldability 71
E. Harkin-Jones and R. Crawford

DEPARTMENTS

News of the Polymer Processing Institute 101

Number 2, Summer 1996

FEATURES

Residence Time Distribution in Extruders Determined by In-Line Ultrasonic Measurements 111
Richard Gendron, Louis E. Daigneault, Jacques Tatibouët, and Michel M. Dumoulin

The Geometry of Self-Cleaning Twin-Screw Extruders 127
Chris Rauwendaal

Comparison of Two Melting Models 135
Chris Rauwendaal

Secondary Phase Inversion Induced by Addition of Polystyrene During Prepolymerization of High-Impact Polystyrene in a Batch Reactor 145
Joon-Yong Park and O Ok Park

Solidification Sensing for Closed Loop Control of Injection Molding Hold Time 151
Charles L. Thomas, Ampere A. Tseng, Anthony J. Bur, and Joseph L. Rose

SPECIAL REPORTS

Fabric Reinforced Thermoplastics: Simulation of the Forming Process 165
A. Biswas and W. Michaeli

Guidelines for the Selection of the Optimum Assembly Technique in Injection Molding Companies 171
W. Michaeli and H. Smets

DEPARTMENTS

News of the Polymer Processing Institute 177

Announcement 187

Number 3, Fall 1996

FEATURES

Extrusion Blow Molding of High-Density Polyethylene–Poly(Ethylene Terephthalate) Blends 191
G. Kumaravel and S. A. Jabarin

Experimental Study on Injection Compression Molding of Cylindrical Parts 205
S. Y. Yang and L. Lien

An Algorithm for Predicting the Properties of Products Incorporating Recycled Polymers 215
C. A. Bernardo, A. M. Cunha, and M. J. Oliveira

Measuring and Reducing Moisture Penetration Through Thick Laminates 223
B. H. Bavisi, G. Pritchard, and J. S. Ghotra

On the Inlet Stress Condition and Admissibility of Solution of Fiber-Spinning 237
T. C. Papanastasiou, V. D. Dimitriadis, L. E. Scriven, C. W. Macosko, and R. L. Sani

The Effect of Shear Flow on the Phase Behavior of Polybutadiene/Polyisoprene Blends 245
K. A. Narh

DEPARTMENTS

News of the Polymer Processing Institute 255

Announcement 265

Number 4, Winter 1996

FEATURES

Phase Morphology and Properties of Injection Molded Polypropylene/Ethylene Vinyl Alcohol Copolymer Blends 269
N. Walling and M. R. Kamal

Effects of Cooling Time and Mold Temperature on Quality of Moldings with Precision Contour 289
S. Y. Yang and L. Lien

Gas Loss During Foam Sheet Formation 297
Shau-Tarng Lee and Natarajan S. Ramesh

Experimental Analysis of the Kneading Disk Region in a Co-Rotating Twin Screw Extruder: Part 1. Flow Characteristics of the Kneading Disk Region 307
Y. Shimizu, S. Arai, T. Itoyama, and H. Kawamoto

Polymer Interactions and the Influence of Molecular Structure on Polymer Miscibility 315
D. J. David

Syntheses and Properties of AB Cross-Linked Polymers: Vinyl-Terminated Polyurethanes/Allyl Novolac Resin 327
Wen-Yen Chiang and Dong-Meau Chang

Assessment of Pigment Distribution in Molded Samples Using an Image Processing Technique 337
L. Latif and S. H. Saidpour

DEPARTMENTS

News of the Polymer Processing Institute 345
